RE: Request for action regarding the Concrete dike system

We are asking the City to approve funding for Jack Knowles of DBA to walk the dike system and determine the specifications needed to repair our concrete dike system.

Secondly, we are asking the City to secure bids upon receiving the specks from DBA so the needed repairs can begin immediately upon approval of our USDA loan.

The repairs must be done prior to any action we would like to take to support this dike wall and stop the continued erosion.

Please keep us informed of your progress on this request.

Thank you and we look forward to your reply and action.

Sincerely,

Susan S. Lopes, Chair
Chris Heid, Vice
Linda Emptage, Secretary
Bill Gardner
